# IN-BUILDING WIRELESS: WE'VE GOT IT COVERED

When over 80% of wireless usage is occurring indoors, why leave the full value of a voice and data network on a building's doorstep?

## IN-BUILDING WIRELESS IS OUR BUSINESS

Design and manage all of your in-building network intelligence from the beginning to the end of the project lifecycle with our collaborative solutions.

## WE SET THE STANDARD THAT OTHERS FOLLOW

Our software suite and certification programs have been adopted by over 280 global leading telecom operators, system integrators and equipment manufacturers in over 70 countries worldwide.

# OUR EXPERTISE BECOMES YOUR EXPERTISE

We've packaged our in-building network engineering expertise into software tools and strategic consulting, enabling wireless operators, system integrators and equipment manufacturers to create the most efficient in-building networks at the lowest cost. The end result is unfailing reliability and service that meets today's expectations for anywhere, anytime connectivity and capacity.

## **iBWAVE DESIGN** DESIGN FROM THE INSIDE OUT

Design flawless in-building wireless voice and data coverage and predict the network quality of complex structures such as airports, high-rise buildings, malls, hospitals, stadiums, hotels and parking lots. iBwave Design ensures quality in-building coverage and capacity to mobile users anytime, anywhere.

## **iBWAVE UNITY** INTELLIGENCE INSIDE

Manage and consolidate all in-building project data in one web-based central location. Enable cross functional project collaboration. Generate business intelligence with advanced financial reporting and network KPIs. With iBwave Unity, gain full visibility of your in-building network during its entire lifecycle.

## **iBWAVE CERTIFICATION** INSIDE KNOWLEDGE

Whether you are new to in-building wireless or already an expert, we will train you to design reliable in-building system networks, guide you through best practices and teach you cost-efficient techniques to successfully manage project operations from initial design to deployment.

# THE IN-BUILDING STANDARD

ADOPTED BY OVER 280 TELECOM LEADERS WORLDWIDE
