“Flexible and service-oriented. Our working method is always about putting the interests of the customer first, as our customers will tell you. And that’s the most important thing.”

“Our customers just have to say: What do I need? Flash listens, helps you brainstorm and then translates your wishes into a suitable solution.”

SIMONE VAN PUTTEN GENERAL MANAGER

Flash Services

Market leader in radio communication

Over fifteen years ago, Flash began renting two-way radios, as a pioneer in radio communication. Soon afterwards, the sale and maintenance of business-critical mobile radio communication solutions were added. We have since grown into a professional market leader. In recent years, Flash has begun to specialise more and more in projects and system integration.

System Integration & Customisation

Flash is your source for professional (ATEX) two-way radios and mobile radios, for private networks or for connections to nationwide networks. We offer customised work and solutions. As an all-in supplier, Flash makes it possible for you to have consultancy, range tests, customised work and choice of equipment all under one roof. We can deliver an integrated system and install connections with paging and control room systems, telephone exchanges, barrier systems or telemetry systems. All of our equipment is available both to buy and to rent.

Our customers

We are a market leader in the Chemical & Refining sector and the Industrial sector, and are growing strongly in other sectors such as Healthcare, Transport & Storage, Construction, Government and Municipalities. By starting up a branch in Belgium, we have increased the service provision to our business relations there and further expanded our market share.

Working with third parties

Flash works exclusively with leading brands of reliable suppliers who feel strongly about quality, such as Motorola, Kenwood, Swissphone, Ceotronics and Peltor from 3M.

Flash is an official distributor of Motorola in both the Netherlands and Belgium, and the exclusive distributor of DAMM Tetraflex systems in the Netherlands. In Belgium, Flash is a distributor of Kenwood equipment and designated as an official partner of A.S.T.R.I.D. We also work together with such parties as Entropia and CallMax.

The Art of Understanding

All above, Flash has mastered The Art of Understanding. Clear communication is essential in situations in which human lives are at stake. Clear communication starts with listening. With that in mind, we want to hear your wishes and requirements. The result is radio communication designed for your company which you can rely on.

Corporate Values

Flash has the ambition to further develop itself as a professional party and wants to project more strength. After all, it is this strength that has brought our organisation to where it is today. And we are proud of that.

Flash sets great store by a humane and conscientious approach. We distinguish ourselves by not only focusing on new business relations, but also maintaining a focus on our current base of customers regardless of their size

Flash is reliable and customer-oriented. We do what we say and we base our actions on the perspective and interests of our customers, as our customers will tell you. And that’s the most important thing.

FLASH’S MISSION STATEMENT

“We strive towards growth and continuity of our business. Flash is a professional market leader offering total solutions in radio communication in a reliable and customer-oriented way so that people and their organisations can communicate flexibly, safely and worry-free. Both our organisation and our products stand for operational reliability. Our products are therefore of the highest quality. Our organisation is innovative and decisive, and we always operate in a service-oriented fashion.”
