

telent in Germany

Partner for Systems Integration and Services

About **telent** in Germany

telent in Germany is a vendor-independent systems integrator and services specialist for communication and mission critical networks. For decades, the company has been successfully active in telecommunications engineering.

“telent is the ideal partner for customers, for the supply and the operation of their technology infrastructure and systems, throughout their entire service life.”

The main focuses of **telent** are transmission networks, network infrastructure and technical services, such as project management, planning, installation and integration as well as operation and maintenance.

Particular characteristics of **telent** are:

- Multi-vendor capacity (vendor-independent)
- Multi-technology expertise (wide range of technology)
- Multi-services portfolio (extensive knowledge)

Further focuses lie in the areas of IP technology for mission critical networks, network and asset management, as well as PMR solutions.

With 400 staff at the company locations in Backnang, Radeberg and Teltow, as well as a nationwide network at the offices, **telent** is one of the largest vendor-independent systems integrators and technology service providers in Germany.

Customers of the company include European network operators, public authorities and companies from the transport, energy supply and security sectors.

Our strengths:

- Focused skill set as a systems integrator and technology service provider
- Broad experience in mobile communications, telecommunications and mission critical networks
- Highly skilled and well trained staff
- Nationwide service network in Germany
- Customer satisfaction is our main priority
- Turnkey capability

Systems integration:

As a systems integrator, the focus of our activities is on the implementation of mission critical networks. The customers are dependent on productive and secure communication, mostly through the use of their own cable and wireless network infrastructure.

telent offers solutions for the following technologies:

- Systems technology
- Network and asset management
- PMR solutions
- Transmission technology (NGN, IP/Ethernet-Transport)
- Network, cable and wireless infrastructure, FTTx

In doing so, **telent** uses established technologies from well-known systems vendors and partners.

Complete Service Portfolio

PLAN
 Consultancy
 Project planning
 Project development

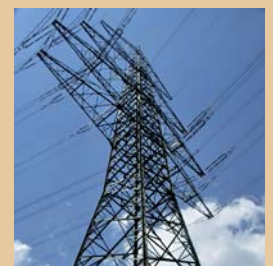

BUILD
